

CVC CEMENT VIBRATORS

Model VMR

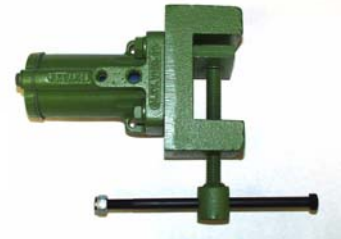

- ◆ ideal for stationary or mobile concrete dispensers or small bins & hoppers (up to 3 ton capacity)
- ◆ unique double-diameter piston guarantees starting at any mounting angle without use of a return spring
- ◆ piston impacts against the rectangular base, transmitting its energy directly to the mounting surface
- ◆ robustly constructed unit runs quieter and matches the mounting centers of most competitor impact style vibrators
- ◆ we offer 1-1/4" and 2" diameter pistons with our rectangular base; square-base models are available with 1-1/4" to 9" diameter pistons
- ◆ supplied complete with mounting bolts & nuts and port protector to prevent entrance of contaminants through the exhaust port
- ◆ optional space-age coating available to allow operation without lubricated air
- ◆ available in an air-cushioned style (VMRAC) where the piston does not impact, reducing noise further for applications where impact-force is not necessary

Also shown are 2 air-powered vibrators, UHVM and VGVM for use on concrete forms where portability is desired.

Model UHVM

Model VGVM
